**1** - DataDirect drivers for Crystal Reports are available from Business Objects. See the Crystal Reports Start Page for download details.

**3** - Data connectivity is assumed to be single-threaded. Customers are recommended not to use these drivers in concurrent on-demand scenarios since reports will be handled serially.

**4 - Generic ODBC, OLEDB and JDBC: Limitation:**

- Database server, Client and ODBC/JDBC/OLEDB driver used must support multiple threads.
- Generic JDBC: 3rd Party JDBC Type 4-compliant drivers may potentially have issues as not all combinations have been tested, but are supported for \*relational database access\* as a general rule.
- Generic ODBC: 3rd Party ODBC Level 2-compliant Drivers may potentially have issues as not all combinations have been tested yet, but are supported as a general rule.

6. Supported for all operating systems listed in the Supported Operating Systems section, except Linux (Red Hat/SUSE).
